

COMPANY  
PROFILE

# Who We Are

TUSK POWER SOLUTIONS (TPS) LTD is a locally owned and operated business that was founded in 2019. We are motivated by the Nigerian power sector's requirement for **high-throughput solutions**. We deliver top-tier customised solutions to suit Nigeria's ever-increasing need for various types of robust, clean, and sustainable, amongst others. Our clients range in size from small to large business. We also provide low-cost energy options to households, such as solar system installations and rural energy programs. Our goal is to deliver high-quality energy solutions and customer satisfaction on all demands that are both **financially and ecologically sustainable**. We currently manage multiple sites across Nigeria's 36 states. Our objective is to create profitable renewable energy projects that are suitable for Nigerian industry, with huge aspirations to expand our services throughout the African continent.

---

## Our Mission

Our goal is to develop profitable and sustainable industrial solutions, appropriate for Nigerian businesses, with grand ideas to spread our services across the World.

## Our Vision

To be the **key driver** in the supply of affordable, superior and long-term energy for industrial businesses and households in Nigeria and throughout the world.

---

## Values

We take pleasure in providing professional services and products using **innovative technology** to fulfil our clients' every demand with **round-the-clock availability** and cost-effective solutions.

The background of the slide features a large, semi-transparent image of a power transmission tower and solar panels. The tower is a lattice structure with multiple cross-arms, and the solar panels are arranged in a grid pattern. The overall color scheme is a mix of yellow, grey, and blue tones.

## Our Strategy

We build a thorough knowledge of our customers' demands with our professionals with decades of expertise, delivering round-the-clock **expert services** both locally and remotely. With this approach, we create long-term and **cost-effective solutions** that enable our customers to run their operations without worry of interruption.

# SOLUTIONS

---

## Service

In order to continually strive for service quality, we have designed our own unique Standard Operating Procedure, which has proved beneficial in satisfying our clients' particular demands on a continuous basis. We have well-trained and motivated employees in order to provide our clients with the highest quality service that they deserve.

## Power Supply

We provide the most well-known brands and **long-lasting generators** for sale, purchase and rentals for commercial and residential uses. This ensures our customers have **continuous power supply** and at varied capacities to satisfy any load requirement{s}.

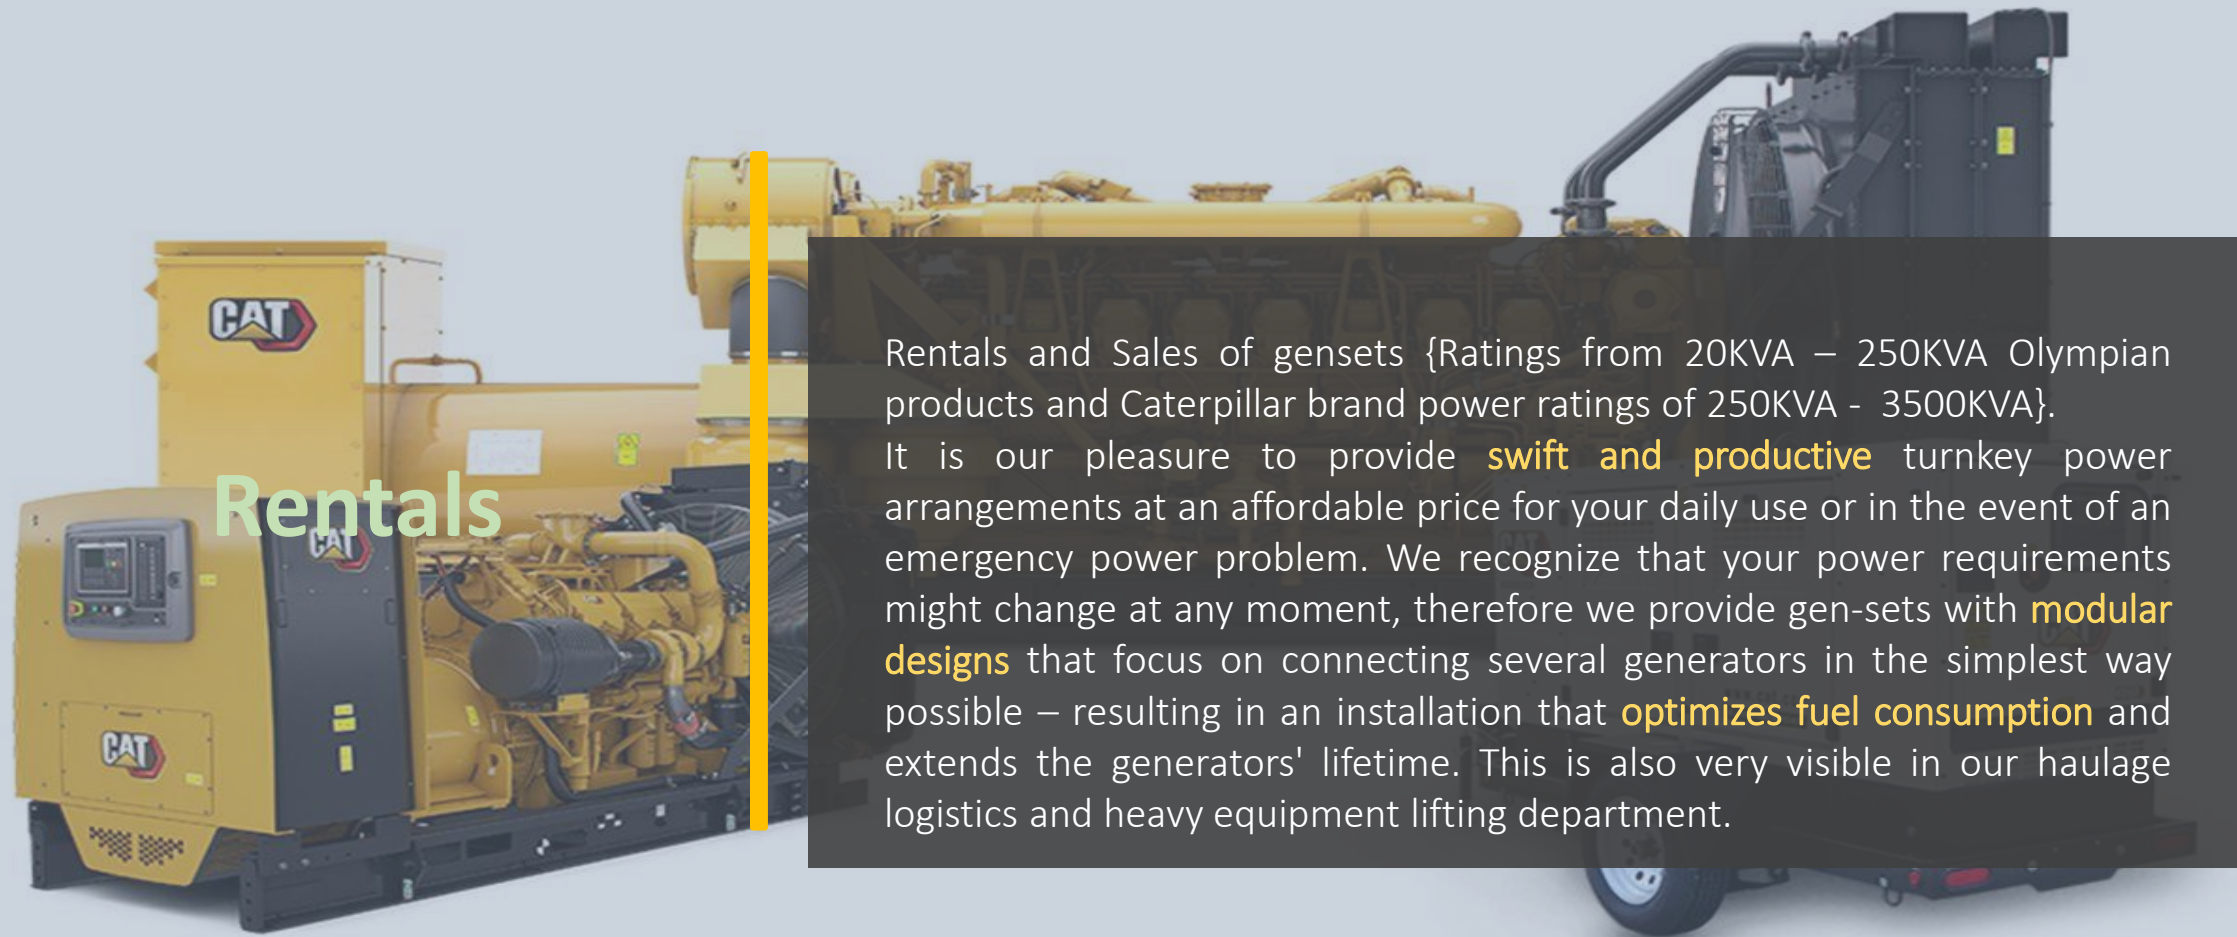

## Spare Parts

We have an inventory of replacement parts to solve any scenario, as well as professional **analytical engineers** that give insights into client needs before they are required.

We design and construct power plants{Panel installation, cables & cable tray installation, construction of water and fuel lines and storage tanks for your choice engines or plants.} We also lift heavy and light duty equipment and machines plus general haulage logistics.

Preventive Maintenance and servicing{which may include Annual maintenance contracts) of generators and generator spares.

## Rentals

Rentals and Sales of gensets {Ratings from 20KVA – 250KVA Olympian products and Caterpillar brand power ratings of 250KVA - 3500KVA}. It is our pleasure to provide **swift and productive** turnkey power arrangements at an affordable price for your daily use or in the event of an emergency power problem. We recognize that your power requirements might change at any moment, therefore we provide gen-sets with **modular designs** that focus on connecting several generators in the simplest way possible – resulting in an installation that **optimizes fuel consumption** and extends the generators' lifetime. This is also very visible in our haulage logistics and heavy equipment lifting department.

## Solar Power

As a solar installations provider {batteries, inverters and panels} and an ecological energy technology provider, we provide integrated sustainable energy solutions for companies and private customers in the most stable and concise manner. We are committed to providing exceptional service, innovative products, customizable, resilient, and sustainable solutions that meet the needs of today's energy provision while also preparing for tomorrow's demands.

# Energy Consultant

Our future-focused energy advisors draw on time-tested skills and experience to assist you in refining your vision, establishing clear objectives, and selecting the best energy source to propel your organization forward. We collaborate with you from strategy formulation through implementation using our comprehensive consulting methodology. In times of continual change, we provide strategic advise on how to successfully pick, maintain, and modify your energy supply.

---

# Clients

We not only provide **exceptional products** and services, but we have also partnered with a number of **industry-leading** organizations all over the world. This means that we provide all of your power needs on time and propel your organization to new heights.

We have engineers with over fifteen {15} years experience working exclusively on CATERPILLAR engines and sister brands and hold a relationship worthy of note with the internationally recognized CATERPILLAR brand amongst others.
